

Personal Information

Front Range Creative may collect personally identifiable information such as name, postal address, telephone number, and e-mail address, through an online contact form. This personal information is collected and used by Front Range Creative for the purpose of facilitating a relationship or a business transaction. Front Range Creative does not sell any personal information for any reason whatsoever. All personal information gathered is used for establishing and maintaining customer relationships with Front Range Creative.

Online Billing / Invoicing

Front Range Creative may collect credit card information from its clients to be relayed to a 3rd party Credit Card Processor and clearing house. This information is transmitted using the highest level of security available and is encrypted.

Secure Transactions & Credit Card Information

Front Range Creative does not retain any credit card information. This includes card account numbers, card code numbers and expiration dates. The website resides behind a firewall and uses SSL (Secure Sockets Layer, the industry-standard security protocol used to communicate with browsers) to transmit personal information. Data is strongly encrypted during transmission to ensure that personal and payment information is secure. Credit Card data is passed securely and directly to an institutionally recognized Credit Card processing company. Industry-standard data encryption techniques are used to protect personal information on our computers. SSL-capable browsers typically have a symbol on the browser window to indicate when they are in a secure mode. In addition, the URL will begin with "https:" for all browsers.

E-mail

Front Range Creative does not sell E-mail addresses. Front Range Creative may generate E-mail for the following types of communication: Notification E-mail to which the individual may subscribe and unsubscribe. Transactional E-mail, which is the result of a business transaction initiated with Front Range Creative

Non-personal Information

Non-personal information is collected behind the scenes on the web server and is used to compile general website usage statistics. Such information includes: IP address of computer, Browser-related information, Locations visited on the website, and HTTP cookies.

HTTP Cookies

A HTTP Cookie is a piece of data that is stored by your browser in either your computer's memory or on your computer's hard drive and is not malicious, contrary to what popular rumor and belief has generated in the past. You cannot gather personal information from visitors using cookies.
